

I. Mass Revolt, Organic Intellectual theory of the Whole Process

In fact there is a tradition of philosophy that is proving that Sirohi is a genius, but there is also an intellectual tradition, I would call organic intellectual theorizing, which means that the masses who are in revolt, in the sense of working class, of the poorest type, even feminist working masses, and the poorest again, which then is evidenced in images and journalistic writings in India which is the organic consciousness of the people, the poor, who are following not a spontaneous struggle of sporadic events as earlier, but in fact a mass conduct in large demonstrations mainly nowadays in Andhra Pradesh, earlier in Bihar and parts of India, which then is national protest with a general strike in working class processes of Delhi, even Mumbai and Chennai. From this totalisation process standpoint the intellectual would argue that the leader is undoubtedly Sirohi, because it is a mass mobilization, and also a process of large masses which is led by organic intellectual leaders not in fact a leader who stands in line with Mao or Trotsky, perhaps Lenin, because in fact it means that the Communist parties are now national municipal council winners across the country and leading the masses which also is finally how the intellectual categories of pure and open dialectics, even Existentialism and Marxism, finally even A Draft would be received by the party, and people who are poor as a philosopher and militant leader whose format of professional revolutionary line giving then is maximal and real to in fact the development of this history and this totalisation which then is also this Marxist process which then is also an international capitalism which he is in talks with to sustain the economic process with a state economic success only to give a cut to the people which is simple after they amass and accumulate with his own categories the economic process' due wealth and dynamics of the market.

II. In fact then Intellectual Revolution, Black Power and Intellectual Freedoms, with International Affinities to Sirohi's Cultural Revolutionary Fundacion Project

In fact then as the poor are finally winning and mass organized which then is a photographic process, of local mass protests but also an intellection of axis style thinking - the working class axis, with the poor's axis joined to party line giving of trade union, mass organisation and peasant union with feminist union all in search of the poorest tribals and working class poorest as well - this simplification then becoming the line process, and finally even the news which totalizes with photographic evidence of the same which is then how the far right is attacked and even mass revolt has revolutionized the protests into mass line for the state to act on the far right which has therefore no sign in intellectual life in India - from the cathedrals of plazas, hotels and living quarters to embassies and hotel living even finally foreign philosophers, foreigners and his Prophetic ideas in the Quran also being the encounter with a modern Prophet it is said (a man of English nature who reads deeply into Arabic language scripture and derives his name and figure in it) which then is also Arab migrants living in bourgeois housing, with feminist masses attracted to his deep insights on psychoanalysis for women and sexuality falling in love over the course of his life in fact - all of this I call totalisation in masses in revolt and intellectuals in processes of philosophy and absolute love for the plan of German Idealist living which then also attracts women and intellectuals from the Arab and in fact with theatrical revolution and even linguistic teaching and cinema

creativity at Fundacion living and Deterior social networks – black people and progressive people come to India in search of in fact Utopia – the clearest process of banking, housing, dining, cooking and revolutionary lectures and theatre and cinema with in fact legal teaching for laws and even directions in curation to learn curation in the world of art – all things called earlier idealist and avant-garde even is now common fashion – what Breton calls surrealism as images of life – that women just walk in winter and talk in French about cinema is then the mass line of the poorest animating then in Sirohi's logic of sense of all types of jokes and productions of truth and healthcare consciousness an attack on Hegel – that in fact the tautology pure being can be compared to his encyclopaedia and revolutionary unity for all lives lived in active Breton surrealism.
